

The Ultimate In Affordable Ozone Technology

An iZone o₃ ozone laundry disinfection system eradicates cross contamination in laundries by killing 99.99% of bacteria, molds, viruses and yeasts without the use of thermal disinfection. Using temperatures lower than 40°C to wash and using the power of ozone to disinfect; an iZone o₃ laundry disinfection system will dramatically lower electricity, water, gas and detergent use as well as your carbon footprint.

Ozone is independently globally proven against MRSA, C.diff, Norovirus, Parvovirus and many other bacterial infections. An ozone system is also superior to a traditional laundry process when it comes to eliminating odors such as vomit, urine and faeces. The iZone o₃ ozone laundry disinfection system is designed to service the needs of organizations where hygiene is a priority at a price all can afford.

- Ozone kills MRSA, C.diff, Norovirus, Parvovirus and many other bacterial infections
- iZone o₃ can be fitted to most makes of commercial and industrial washing machine
- Suitable for use with all fabrics including woollens
- Dramatically lower electricity, water, gas and detergent use
- Helps to reduce your carbon footprint
- An ozone laundry system at a price all can afford
