

Active O: The Commercial Ozone Unit

- Easy to roll Rugged Mobile Ozone Generator
- Ozone output 12g / hr for fast removal of odours & for sanitizing
- Generator removes the Ozone from the air after treating the room with Ozone
- Safety Siren sounds before & after treatment
- One minute safety delay provided to make sure room can be evacuated safely
- Ozone remains constant for the duration of the treatment & does not decrease. Important to note this when dealing with fire & water damaged conditions as no other generator can do this
- Wheels do not leave tracks on the carpet.

Panther: Professional Portable Ozone Unit

- Portable, Rugged hand carried Ozone Generator
- 7.5g / hr of Ozone output for fast removal of odours & sanitization
- Panther has connection for external timer to allow variable repeated cycles. Eg: Panther on for 5 mins every hour 24 hours a day or 5 mins / hour over 8 hour period etc...
- One minute safety delay is provided to allow persons to evacuate treated area safely.
